

FloWell Kit

Brand: NDS

Product No: FWAS24WH.PL

Size: 50 Gallons 28 3/4" H Black

Description

- A manufactured dry well that is an easy to install and sustainable solution for storm water runoff.
- Used independently or as part of a larger storm water management system, FloWell units collect, retain, and discharge storm water on-site, offering a gravel-free alternative to a traditional dry well.
- Units are modular and can be connected in series or stacked to meet a variety of project needs and accommodate higher volumes of water.
- Easy to install and does not require heavy equipment.
- Holds over 50% more than a traditional peastone drywell.
- Manufactured from 100% recycled plastic
